2.1 Transport Import Instructions	5
2.2 Pathlock DAC Data Scrambling - Un-Installation	5
2.3 Transport Notes	5

1 Overview

SAP ECC and S/4HANA maintain security through role-based access controls, which assist organizations in preventing unauthorized access and mitigating risk violations. Pathlock Data Scrambling is a technique employed to obfuscate or anonymize original data within the database of non-production environments.

1.1 Purpose

This document provides high-level information regarding the installation of Pathlock DAC – Data Scrambling.

Important Information:

- Data scrambling is only permissible in non-production systems.
- Retaining a client backup before proceeding with data scrambling is advisable.
- Cluster tables are not supported.
- A field value, once scrambled, cannot be scrambled again.

2 Pathlock DAC Data Scrambling – Installation

2.1 Transport Import Instructions

The table below outlines the sequence for importing cofiles from each folder to install Pathlock DAC. These folders are available in the main folder, "**Release Cofiles**," accessible through the shared URL.

Sequence	Folder Name	Transport Number
1	Workbench_ECC_and_S4HANA	YS9K900873
2	Customizing_ECC_and_S4HANA	YS9K900883

2.2 Pathlock DAC Data Scrambling - Un-Installation

The table below outlines the steps to uninstall Pathlock DAC in the specified sequence:

Step	Instruction
1	Import cofiles available at folder path: <i>Pathlock DAC – Data Scrambling -> Uninstallation folder</i>

Sequence	Folder Name	Transport Number
1	Uninstallation	SFRK900046

2.3 Transport Notes

Use the **transport order** mentioned in [Section 2.1](#) to import the software into the SAP system.

Save the **transport files** in the following SAP directories:

- “D” & “R” files = Save in /usr/sap/trans/data
- “K” files = Save in /usr/sap/trans/cofiles

Note: If you encounter any import errors with return code 8, download the transport error log and email it to support@pathlock.com, warnings with return code 4 can be ignored.
