Release History

This document provides a release-wise listing of the new features and enhancements introduced to **Pathlock Dynamic Access Controls (DAC)**.

Pathlock DAC 2026Q1

Release Date:
New features and enhancements in the Pathlock DAC 2026 Q1 Release: • Added support for Data Restrictions in OData V2 services, enabling more granular control over data access and helping organizations enforce security policies across OData-based integrations. • Introduced email alerts for DAC policy activity, giving administrators quick visibility into monitored policy evaluations without manual log checks.

Pathlock DAC 2025Q4

Release Date: December 18, 2025
New features and enhancements in the Pathlock DAC 2025 Q4 Release: • Introduced Policy Simulator feature that allows policy administrators to evaluate and test individual policies independently, based solely on defined rule conditions. This enables isolated validation of complex policies without dependency on or interference from other active policies in the system. • Enhanced Data Classification Simulation by improving the selection criteria, enabling more accurate and flexible simulation of data classification scenarios. • Enhanced Data Discovery to retrieve all relevant transaction codes, database tables, and OData services where a specified data element is used, supporting comprehensive impact analysis and faster decision-making.

Pathlock DAC 2025 Q3

Release Date: Sep 30, 2025

New features and enhancements in the Pathlock DAC 2025 Q3 Release:

The Pathlock DAC Configuration tool has introduced 1 key features:

- Version History: Users can now see each version (in case of any addition / deletion or modifications done) of policy and its associated functionalities – list and data classification.
- A refined user interface (UI) has been improved to simplify configuration within the Pathlock DAC Studio.

Pathlock DAC 2025 Q2

Release Date: July 30, 2025

New features and enhancements in the Pathlock DAC 2025 Q2 Release:

The Pathlock DAC Configuration tool has introduced 3 key features:

- Data Classification Simulation: Allows users to simulate the data classification functionality on database tables.
- Masking in BW: Masking is now supported in BW applications
- The WHERE clause in LOOK UP now supports multiple field conditions from a table using 'AND' logic.

Pathlock DAC 2025 Q1

Release Date: March 14, 2025

New features and enhancements in the Pathlock DAC 2025 Q1 Release:

The Pathlock DAC Configuration tool has introduced two key UI enhancements:

- Look Up: Allows users to derive data attributes using policy conditions, eliminating the need for coding.
- List: Enables the storage of static values or ranges for easy use in policy or Data Classification conditions.

Pathlock DAC 2024 Q4

Release Date: October 17, 2024

New features and enhancements in the Pathlock DAC 2024 Q4 Release:

- A refined user interface (UI) has been introduced to simplify configuration within the Pathlock DAC Configuration tool.
- Web Dynpro is now supported with Data Masking & Data Restriction functionalities.

Pathlock DAC 2024 Q2 PS1

Release Date: July 25, 2024

New features and enhancements in the Pathlock DAC 2024 Q2 PS1 Release:

- An enhanced user interface (UI) has been introduced for streamlined configuration within the Pathlock DAC Configuration tool.
- Web Dynpro is now supported with field-hiding functionality.
- User Mini Master has been enhanced to support derived role scenarios.

Pathlock DAC 2024 Q2

Release Date: May 08, 2024

New features and enhancements in the Pathlock DAC 2024 Q2 Release:

- An upgraded user interface (UI) for more efficient configuration tasks, enhancing usability, and streamlining the process.
- Data classification capabilities have been enhanced to categorize data more effectively, utilizing maintained data attributes and their associated values.
- The Policy Execution Logs feature displays Pathlock DAC execution logs.
- The ABAC Feed feature displays the execution logs for the past 24 hours. Upon using refresh button, it updates real time data.
- The Export Configuration feature enables the export of DAC configuration either via Transport Request or as a file, based on the policies in place. Users can then import the policy configurations via folder or Transport Request into target system or client.
- The Masking Pattern feature has been introduced, enabling users to maintain different masking patterns for Data Masking scenarios.
- The Masking Message feature allows users to define custom messages for Data Masking scenarios on a per-policy basis.
- The Authorization Checks feature facilitates policy creation and editing with strict authorization checks based on specified fields, allowing only authorized users to access and modify policies.
- Pre-conditions functionality has been added to determine whether the policy needs evaluation or not.

Pathlock ABAC v703

Release Date: December 22, 2023

New features and enhancements in Pathlock ABAC v703 Release:

- An enhanced user interface (UI) has been introduced for streamlined configuration within the Pathlock ABAC Configuration tool.
- The System Readiness Check feature now incorporates a report that ensures all prerequisites are met before the product is used.
- Data Classification capabilities have been improved to classify data based on the data attributes maintained and their corresponding values.
- ABAC Centralization now allows for the publication of policy configuration data to a designated system.
- The Field Finder Report has been specifically designed to identify the technical addresses of fields.

Pathlock ABAC v702PS2

Release Date: September 20, 2023

New features and enhancements in Pathlock ABAC v702PS2 Release:

- Enhanced UI for streamlined configuration in the Pathlock ABAC Configuration tool.
- Data Access Control (Filtering, Output, & Input Blocking) in UI5/Fiori Applications.
- Customizable Message for Data Access Control Scenarios.
- Optional configuration to maintain reference applications for tracking the configured Data Elements.
- Improvements in User Master maintenance.

Pathlock ABAC v702PS1

Release Date: August 01, 2023

New features and enhancements in Pathlock ABAC v702PS1 Release:

- User Master maintenance.
- Improvements in Data Access Control functionality.

Pathlock ABAC v702

Release Date: July 21, 2023

New features and enhancements in Pathlock ABAC v702 Release:

- Optimized UI for effortless configuration in the Pathlock ABAC Configuration tool.
- Data Access Control (Input Blocking) in GUI - Module Pools.
- Data Access Control (Filtering) for Table Controls in GUI – Module Pools.
- ‘Additional Configuration’ option under ‘Technical Configuration’- This option allows system users to define technical addresses for a field within specific output options. The supported output options encompass GUI - Module Pools, ALVs/Tables, Search Helps, and UI5/Fiori Applications.
- ‘Exposed Attribute’ available in ‘Policy Administration’ under ‘Rules’- This feature facilitates linking screen attributes, enabling the derivation of the actual Data Attribute (used in policy rule conditions) through the implementation of the Data Attribute BADI# /APPSDM/DATA_ATTRIBUTES.

Pathlock ABAC v701

Release Date: May 15, 2023

New features and enhancements in Pathlock ABAC v701 Release:

- Improved UI for simplified configuration in the Pathlock ABAC configuration tool.
- Data Access Control (Output Blocking) in GUI - Module Pools.
- Data Access Control (Filtering) in ALVs (Grid & List), SE16 Standard List, SE16 (Data Browser), SE16N and Search Helps.
- UI5/Fiori Configuration under Technical Configuration to support scenarios where fields are not mapped with Data Elements in S4HANA systems.
- Default User Attributes (User ID, User Role, User Country, User Department, User Group, and User IP Address).
- Masking API for non-SPI scenarios, including hierarchical sequential lists and masking data (read-only) going out of SAP system.

Pathlock ABAC v700

Release Date: March 28, 2023

New features and enhancements in Pathlock ABAC v700 Release:

- Revamped UI for easier configuration in Pathlock ABAC Configuration tool.
- Data Masking support in SAP GUI - Module Pools, ALVs (Grid & List), SE16 Standard List, SE16 (Data Browser), SE16N and Search Helps.
- Configurations are based on data elements, independent of the transactions/applications, separate sections for Functional and Technical configurations.
- Business users write ABAC policies in a straightforward language using natural language, and technical users mapping business.
- objects to technical objects (e.g., Data Elements) as well as writing ABAP code.
- ABAC policies are re-usable and modular, enabling multiple policies to be linked to a single data attribute and vice versa.
- The Policy engine has the capability for custom Attributes, utilizing custom code based on customer requirements, as well as the ability to read both SAP and custom tables to fetch attributes such as citizenship, VIP status, and material sensitivity.
